

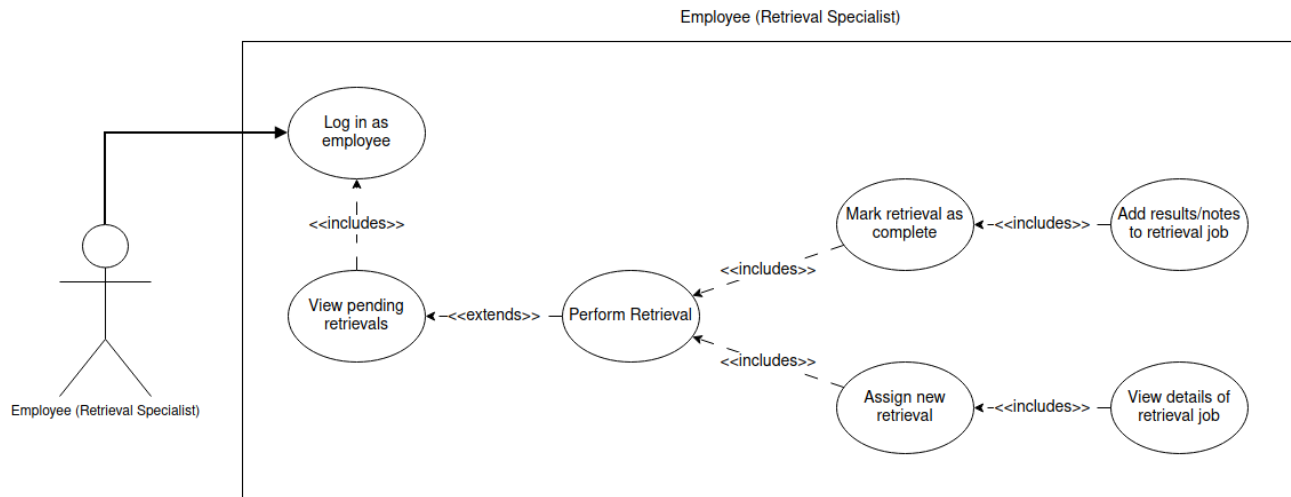

Figure 5: Retrieval Specialist Use Case

Participating Actor: Retrieval Specialist (Employee)

Entry Conditions:

- Employee logs into service, wants to perform retrieval
- Employee logs into service, wants to report results of retrieval

Exit Conditions:

- Employee logs out, intending to perform retrieval
- Employee logs out, having added details/results of retrieval task

Event Flow:

1. Employee logs in to service.
2. Employee views available/pending retrieval tasks
3. Employee chooses desired action:
 - a. Assign new retrieval, view details of retrieval job
 - b. Mark retrieval as complete, add details/results of retrieval task
4. Employee exits service by logging out or closing service
