

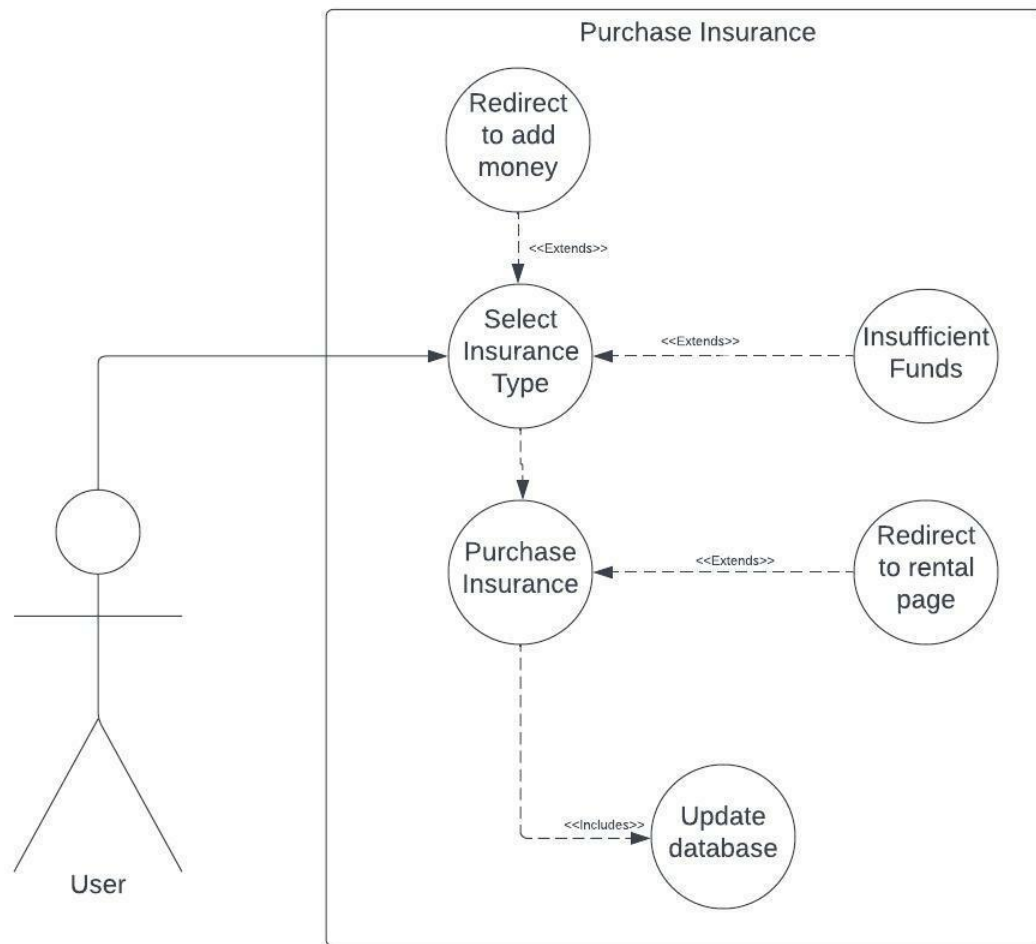

Figure 8: Add Insurance

Participating Actor: User (Customer)

Entry Conditions:

- User wants to add insurance to their rental car

Exit Conditions:

- User purchases insurance for rental car
- User decides to not purchase insurance
- User is redirected to add funds to their account

Event Flow:

1. The user selects what kind of insurance they would like to purchase.
2. Their funds are verified against the cost of the insurance.
3. If not, sufficient funds are not available, user is prompted to redirect and add more funds.
4. If sufficient funds are available, user is able to confirm their purchase.

5. User completes their purchase; database is updated with insurance information.
6. User is redirected to the original car rental page.
