

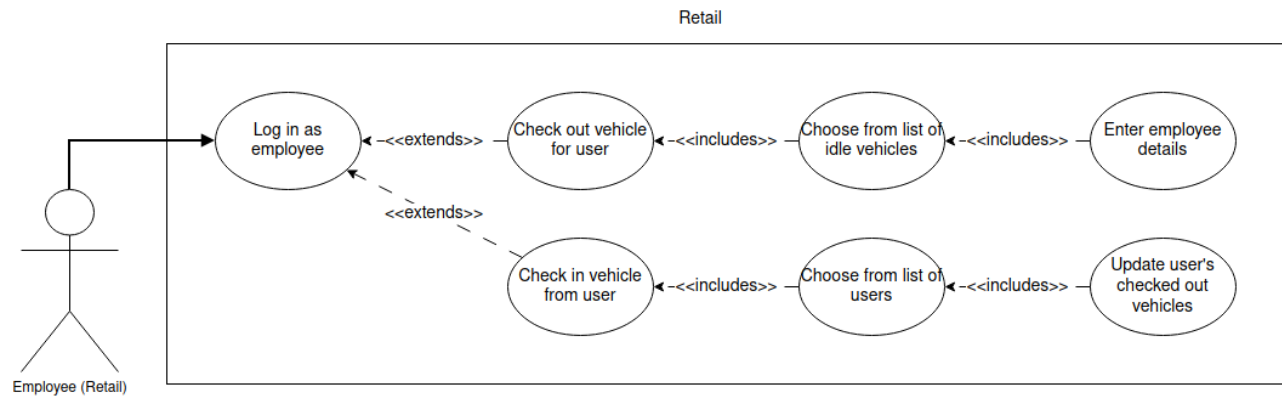

Figure 5: Retail Employee Use Case

Participating Actor: Retail Employee

Entry Conditions:

- Employee logs into service, wants to check in or out vehicle for customer

Exit Conditions:

- Employee logs out, having checked in or out vehicle for customer
- Employee logs out, having not taken any action

Event Flow:

1. Employee logs in to service.
2. Employee chooses desired action:
  - a. Check out vehicle for user. Choose from list of vehicles, and enter customer details
  - b. Check in vehicle from user. Choose from list of users, then mark desired vehicles as checked in
3. Employee exits service by logging out or closing service
